

Description

Equipped with direct-drive, high-torque hydraulic motor. These low maintenance attachments efficiently mill asphalt or concrete. Planers feature hydraulic side-shift for planing close to walls and curbs. Consistent depth control and ski depth visible from the operator's seat. Make precise adjustments with fingertip controls.

Main features

- Top access panel—for easier bit service and maintenance.
- Side cutting bits—to decrease drum binding in the cut and to produce a vertical edge for improving the joint bond between a new layer of asphalt and the existing layer.
- Hydraulic side-shift—for planing close to walls and curbs, and to easily reposition the drum for another pass.
- Oscillating planer housing—for planing sloping surfaces or to match two uneven surfaces.
- Rear frame wheels—to provide support and reduce tire bounce while planing.
- Direct-drive high torque motors—for low maintenance and high efficiency.
- Bob-Tach™ mounting system with quick-connect controls—for fast, easy attachment changes.

Applications

- Road work, Recycling and Cleaning
